
Nothing ever works the way you want it to. I wanted my TV interface with web-DVR to be intuitive and simple. I downloaded that software, installed it, and found out that in order for it work you have to download this other program on your computer too? Who has time for that!? But don't worry - today I'll share with you a new software called Lvr Web DVR Client V3.5.3.exe. It's free, easy to use, and mostly intuitive! You can get more information on their website at <https://www.lvrclient.com/> Here's a link to the software you'll need: <http://www.lvrclient.com/dl/webdvrclientv3.5.3.exe>
